

1.2

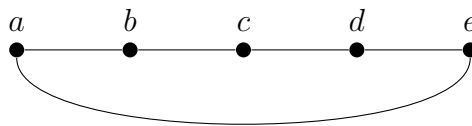

4. If directions are ignored, are the two graphs in Figure 1.11 isomorphic?

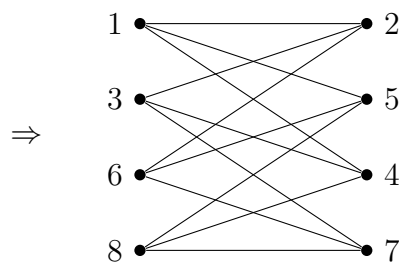

Both G_1 and G_2 have 8 vertices each of degree 3

Bipartite Check

G_1 : Start from vertex a and consider the following circuit C

$\Rightarrow C$ is of odd length $\therefore G_1$ is not bipartite. G_2 : Start from vertex 1.

$\Rightarrow G_2$ is bipartite $\therefore \boxed{G_1 \not\approx G_2}$
